OHALITATIVE ANALYSIS								

The Bank's core capital as of 30 September 2020 was IDR 29.1 trillion, a slight increase compared to the core capital in the previous period. This is due to an increase in net profit for the current period and a reduction in the differences between required provision and allowance for impairment losses of earning assets.

The Bank's total capital as of 30 September 2020 was IDR 36.8 trillion, an increase compared to the total capital in the previous period. This is due to an increase in net profit for the current period and a reduction in the differences between required provision and allowance for impairment losses of earning assets.

In March 2020 total RWA increased significantly to Rp 161.9 trillion, this was due to the increase in RWA credit risk, which was also influenced by the high USD exchange rate of 16,310. However, the total RWA has gradually decreased until September 2020 to Rp 147.5 trillion in line with the decrease in RWA credit risk.

The CET1 Ratio & Tier 1 Ratio increased along with the increase in Core Capital and the decrease in Total RWA.

The Capital Adequacy Ratio decreased starting from March 2020, but began to increase from June 2020 to September 2020 at the position of 24.91% due to an increase in Total Capital and a decrease in Total RWA.

^{*}T is quarterly period, T-1 is 1 quarterly previous period
